

# Child Talker Beta How To Use:

**Getting Started** ..... Page 2

**Types of Tiles** ..... Page 3

***Talker Tiles*** ..... Page 3

***Folder Tiles*** ..... Page 3

***Functional Tiles*** ..... Page 3

## Getting Started

- I. Launch the application by clicking the “Child Talker Beta” Icon on the desktop
- II. The application will then launch and bring you to a screen with a red background
- III. To get started select “insert” in the upper left hand corner
  - A. If “Talker Tile” is selected user will be prompted to:
    1. Enter a phrase for the Talker Tile
    2. Select an image for the Talker Tile
    3. If both are provided a new Talker Tile will be added to the screen
  - B. If “Folder Tile” is selected user will be prompted to:
    1. Enter a name for the Folder Tile
    2. If a name is provided the folder tile will be added to the screen
- IV. To delete a tile right click on the Tile then select yes when asked if you would like to delete the Tile
- V. The application autosaves, any changes that are made will be saved on exit.

## Types of Tiles

### Talker Tiles (aka Items)

- I. Talker Tiles are Tiles that sound the phrases written on them when selected
- II. Talker Tiles can be deleted:
  - A. If a Talker Tile is right clicked then the user will be asked “Would you like to delete this tile?”
    - 1. If “Yes” is selected then the Tile will be deleted
    - 2. Otherwise if “No” is selected then the Tile will not be deleted.

### Folder Tiles

- I. Folder Tiles are Tiles that contain another view / other Tiles
- II. When a Folder Tile is selected The Display will change to show the Tiles that were stored within the selected Folder.
  - A. When a Folder Tile is selected a “Back” Tile will be available to allow the user to return to the previous view.
- III. Folder Tiles can be deleted:
  - A. If a Folder Tile is right clicked then the user will be asked “Would you like to delete this tile?”
    - 1. If “Yes” is selected then the Tile will be deleted
    - 2. Otherwise if “No” is selected then the Tile will not be deleted.

### Functional Tiles

- I. The “Back” Tile is a Functional Tile -> returns to the previous page
  - A. If you select “Back” you will return to the view you were at before selecting the most recent Folder Tile.
  - B. “Back” is only available when there is a view to go back to.
